Call a Teams Chatbot via a Power Automate Flow  
06-06-2022 06:53 AM

Hi.

I created a chatbot using Power Virtual Agents and added it to a Teams channel. When someone posts a message on the Teams channel, I want to reply to that message using Power Automate. This Power Automate message should be able to @mention and call the chatbot. Is there a way to accomplish this?

Thanks in advance.

# Minimal Path to Awesome

1

Build and Publish Power  
Virtual Agent

2

Create a Microsoft  
List and apply view  
formatting

3

Create a Microsoft Team  
and Channel

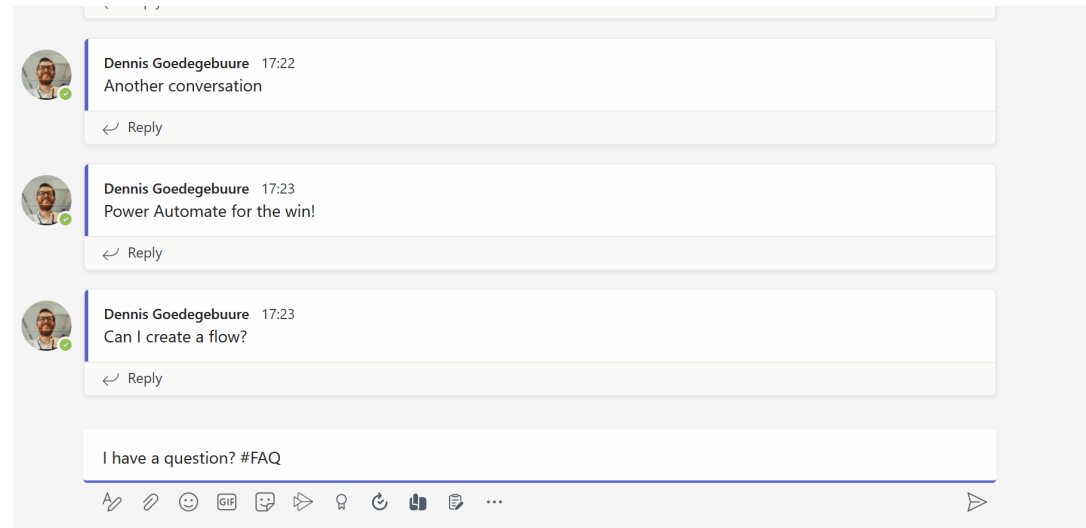

4

Create a Power  
Automate Cloud flow  
which triggers on a key  
word and post a  
message with a bot  
mention

5

Test, test, test

# Demo

# Thank you
